PROFILE

4th-year Bachelor of Science in Information Technology student with hands-on experience in frontend development and software quality assurance. Skilled in building user-friendly web and mobile interfaces using React and Flutter, as well as testing applications, identifying bugs, and documenting defects clearly. Seeking an OJT opportunity in Frontend Development or Quality Assurance where I can contribute to real-world projects, strengthen my technical skills, and gain professional industry experience.

EDUCATION

Pambayang Dalubhasaan ng Marilao
Bachelor of Science in Information Technology | 4th Year
Marilao, Bulacan | Expected Graduation: 2027

TECHNICAL SKILLS

Languages	`Dart, Python, PHP, C#`
Web Technologies	`HTML, CSS, JavaScript`
Frontend & Mobile	`React, Flutter`
Backend & APIs	`Node.js, Express.js, REST APIs`
Database	`MongoDB, MySQL, Supabase`
Tools & Platforms	`Git, GitHub, Render, Vercel`

PROJECTS

SOLARIS: An IoT Web-Based Solar Energy Site Pre-Assessment and Billing System with Mobile Application for Salfer Engineering and Solar Technology Enterprises

Web + Mobile

- Built SOLARIS, a web and mobile system to help Salfer Engineering streamline solar site assessments and project monitoring, making records more organized and project updates more transparent for clients.
- Team project: handled the front end and quality assurance (testing and defect logging).

Stack: MongoDB, Express.js, React, Node.js (MERN), Flutter, Dart, JavaScript, REST API, Vercel, Render

Rentahanan: A Web-based Tenant Admission and Billing Management System for Local Rental Houses

Web Application

- Built Rentahanan, a web system to help local landlords manage tenants, applications, and billing more efficiently, while giving tenants easy access to their units, bills, and payment records.
- Team project: mostly front end with minor backend work, plus QA (testing the app and reporting bugs).

Stack: React, SQLAlchemy, MySQL (phpMyAdmin), REST API

GawaWeb: AI Website Builder

Web Application

- Built GawaWeb, an AI-powered website builder that turns a plain-language description into a live site preview, with a visual editor and AI chat for revisions.
- Solo project: front end, API integration, and deployment (static front end on Vercel, backend on Render).

Stack: React, Vite, Node.js / Express, MongoDB Atlas, REST API, OpenAI / Groq
